RICHARD ROBINSON
CHAIRMAN

July 24, 1979

905

The Honorable Speaker of the Assembly
The Honorable President pro Tempore of the Senate
The Honorable Members of the Senate and the
Assembly of the Legislature of California

Members of the Legislature:

Your Joint Legislative Audit Committee respectfully submits the Auditor General's report allocating state highway revenues and expenditures on a county-by-county basis. Certain assumptions were made in allocating the remaining amounts. These assumptions are also discussed in the report.

The auditors are Mike Zimmerling, CPA, Supervising Auditor; Georgene Williams; and Harriet Kiyan. Support staff is Lucy Chin.

Respectfully submitted,

RICHARD ROBINSON
Assemblyman, 72nd District
Chairman, Joint Legislative
Audit Committee

Appendix C--Revenues	C-1
Appendix D--Expenditures and Distributions	D-1

SUMMARY

The Auditor General conducted a study to determine, on a county-by-county basis, the source of funds supporting the California highway systems and the expenditure and other distributions of these funds.

Because few records are kept showing revenues and expenditures by county, most distributions are estimated. The estimated revenues and expenditures by county for fiscal years 1974-75 through 1977-78 are shown on page 4. The revenue shown in this table is collected through seven major fees and taxes.

STUDY RESULTS

In response to a resolution of the Joint Legislative Audit Committee, we have conducted a study to determine, on a county-by-county basis, the source of funds supporting California's highways, streets and roads and the expenditures and other distributions of these funds. This study was conducted under the authority vested in the Auditor General by Section 10527 of the Government Code.

Revenue to support the state highway program is derived from seven major fees and taxes, collected by two agencies and deposited into five different accounts. Estimates in this report are based on data obtained from the following agencies:

<u>Department</u>	<u>Data Used</u>
Department of Motor Vehicles	Registered vehicles per county; Licensed drivers per county
Department of Transportation	State highway expenditures;
State Controller	Federal funds received; Transportation funds revenue, expenditures, and transfers; Streets and roads report; In-lieu subventions
Board of Equalization	Taxable service station sales
Department of Finance	Population statistics
Department of Transportation, Federal Highway Administration	Federal highway users revenues

Although statewide totals of revenues and expenditures are available, our study revealed that data by county is available for only 2 percent of revenues and 30 percent of expenditures. Therefore, most revenues and expenditures reported for each county are estimates. Table A below details the revenues and expenditures estimated for each county for fiscal years 1974-75 through 1977-78:

TABLE A

Total	<u>\$8,934,425,327</u>	<u>100.000</u>	<u>\$8,451,665,229</u>	<u>100.000</u>

The remainder of this report consists of appendices which explain and support the data in Table A. Some of these appendices describe the types of revenues and expenditures funding the state highway program, other related state programs, and local streets and roads programs; others enumerate the assumptions we made in allocating these funds by county.

Appendix A includes tables detailing each major type of revenue and expenditure. The various transportation fund accounts are categorized and discussed in Appendix B. Appendix C focuses upon the revenues supporting these accounts; it also lists the assumptions we made in estimating each county's share of these revenues. Likewise, Appendix D explains the expenditures and distributions of funds from the accounts along with the assumptions underlying the allocations by county.

Since this report is based upon certain assumptions whose adoption has yielded estimated figures, consideration of these assumptions is imperative for interpreting and reviewing the study results. Furthermore, because highway projects may last many years, the revenues and expenditures of any year or years within this study may not accurately represent all years.

Respectfully submitted,

Subject: Draft Report "Highway Revenue Distributions"

Thank you for the opportunity to comment on the draft report "Highway Revenue Distributions". We recognize this effort as a very difficult task. Given the lack of county identification that now exists for revenues and expenditures, we feel that your staff has prepared the report as well as possible. They should be commended for the amount of effort required to prepare the material. However, any users of the distribution percentages should be made fully aware of the potential for inaccuracy. This is doubly important because any report of this kind raises the basic issue that some areas are by nature donors to other areas that are recipients of more than they contribute. This is true on a national scale between states as well as within the State structure, and there seems to be great difficulty in arriving at a satisfactory resolution of the issue itself.

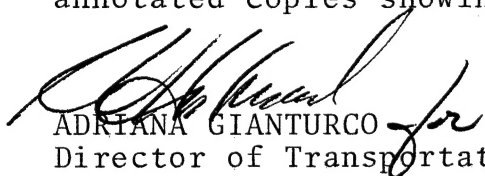

Inaccuracies in the report are due to a lack of basic data which requires a great many assumptions. Transportation revenues are not identified by county because the major portion is generated by fuel taxes. These taxes are not collected where the fuel is used in various counties, but rather at the primary distribution point. A limited amount of expenditures of transportation funds is identified by county, but, even so, the majority carry statutory requirements which have caused them to be assigned other than county identification. Therefore, developing percentages based on such limited information requires assumptions. Actual percentage distributions prepared from such a limited base and from the application of subjective assumptions must be recognized only as gross estimates.

In reviewing the draft of the report, we did not address the numerical accuracy of the data; however, we identified the need for a number of minor and technical corrections. In addition, we identified these major concerns:

Mr. Thomas W. Hayes
Page 2
July 18, 1979

1. Distribution percentages may be invalid when developed from a very limited statistical base (as stated 2% of revenue and 30% of expenditures) and projected through application of subjective assumptions.
2. The difficulty in making any valid assessment of the actual impact of the assumptions applied.
3. The lack of agreement between the information in the report developed on a cash basis in most cases and published State budget documents.
4. Some omissions from the report of related funds such as Transportation Development Act monies.
5. The necessarily limited time period covered by the report which could cause a skewing of the data.

Because of the difficulty in expressing the wide variety of our concerns, a meeting was scheduled with your staff on July 17, 1979, at which we discussed the suggested changes. We also provided annotated copies showing these changes.*

ADRIANA GIANTURCO
Director of Transportation

* These changes were reviewed and appropriate revisions were made prior to publication of the final report.

REVENUES AND EXPENDITURES TABLES

In constructing the following tables, we allocated State Transportation Tax Fund and Federal Highway Trust Fund revenues and expenditures by county for fiscal years 1974-75 through 1977-78. Many of these allocations are based on assumptions which are listed in Appendices B, C, and D.

STATE TRANSPORTATION FUNDS

The accounts described below--Motor Vehicle Fuel Account, Highway Users Tax Account, Motor Vehicle License Fee Account, Motor Vehicle Account, and the State Highway Account--support the state highway program.

Motor Vehicle Fuel Account

Both gasoline distributors and diesel fuel users pay a state gasoline tax of seven cents per gallon to the Board of Equalization. After the required refunds are made to the distributors and users, the costs of collection by the Board of Equalization and statutorily required distributions are made to other funds. Then the remainder of these monies is transferred to the Highway Users Tax Account for further distribution.

Highway Users Tax Account

Through this account, an amount equal to 3.39 cents per gallon of the state gasoline tax is distributed to cities, counties, and cities and counties, according to statutory requirements in the Streets and Highways Code, Sections 2104, 2106, and 2107. Use of these resources by the local agencies is restricted to highways, streets, and roads.

Two other transfers are made from this account. Section 2106(b) of the Streets and Highways Code requires that the account transfer funds to the Bicycle Lane Account. To maintain and repair highways within the state park system, Section 2107.7 of the Streets and Highways Code requires a transfer of monies to the Bagley Conservation Fund. The balance is transferred to the State Highway Account.

Motor Vehicle License Fee Account

The Department of Motor Vehicles assesses license fees of two percent of the market value of all motor vehicles and trailer coaches registered in the State. After the department makes necessary refunds, it deducts the amount of its appropriation.

An amount equal to 2.5 percent of the remaining balance is then transferred to the Motor Vehicle Account as mandated by Section 11005 of the Revenue and Taxation Code. Trailer coach fees are returned to counties in which the vehicles are registered. One-half of the remaining balance is returned to counties according to their proportionate share of the State's population. The other half of the balance is transmitted to cities based on each city's population in proportion to the total population of all cities. There is no restriction on the use of these funds by the localities.

Although most of this revenue either supports state agencies or is returned to local entities, it is included in this study for three reasons:

- (1) Motor vehicle owners and operators pay these fees
- (2) The distribution of these fees to counties has no relation to the source from which the revenue is generated.
- (3) Some of the revenue is transferred to the Motor Vehicle Account from which funds are transferred to the State Highway Account. The Department of Transportation draws funds from this account for

Motor Vehicle Account

These fees, which the Department of Motor Vehicles collects, include registration fees, weight fees, and drivers' license fees.

Most of this revenue supports the Department of Motor Vehicles and the California Highway Patrol. Some of the monies are transferred to other agencies. As required by Section 42273 of the Vehicle Code, the balance is deposited into the State Highway Account which the Department of Transportation expends on the state highway program.

State Highway Account

The state gasoline tax which is transferred from the Highway Users Tax Account and the federal highway users tax distributions provide the two main sources of funds within the State Highway Account. Sources of other revenue within this

Interest earned on surplus money investments, which totalled \$28.9 million in fiscal year 1977-78, constitutes the largest amount of other revenue in the State Highway Account.*

fund balance in the State Highway Account.

REVENUES

Although revenues supporting the state highway program are available in statewide totals, these totals are not normally reported by county. Below is a discussion of the various revenues and the assumptions we made in allocating these revenues by county.

Gasoline Tax

The State of California imposes fuel tax on gasoline at the rate of seven cents per gallon; the Federal Government claims an additional four cents per gallon. These taxes contribute the largest proportion of money to the State's highways, streets, and local roads. To calculate the amount of revenue each county provides, we computed four separate estimates based on (1) a study of taxable gasoline sales by county conducted in 1974,* (2) the number of vehicles registered in each county, (3) the taxable sales of service stations, and (4) county populations. The average of these four estimates was computed. (See table on page A-7.)

To support this methodology, we made five assumptions:

1. Per capita gasoline purchases are equivalent in each county.

* This study showed the percentage of total taxable gasoline sales made in each county. It compared taxable sales of service stations before and after the application of sales tax to gasoline. The difference was attributed to gasoline sales from which the county percentages were derived. (Gasoline Sales by Counties, R. W. Mearns, State of California, Department of Transportation, Division of Transportation Planning, July 11, 1974.)

2. The amount of gasoline used per vehicle in each county is equal.
3. The number of vehicles exempt from gasoline tax in each county is directly proportional to the number of vehicles subject to the tax per county.
4. Gasoline purchases per registered vehicle in one county are proportional to gasoline purchases per registered vehicle in another county.
5. The relationship between the sale of gas and the sale of other taxable items sold in a service station is proportionate in all counties.

Diesel Tax

Each county's diesel tax revenue was estimated on the basis of registered commercial vehicles per county.

To calculate this revenue amount, we assumed (1) that the amount of diesel fuel purchased per county is in proportion to registered commercial vehicles, and (2) that the ratio of registered commercial vehicles using diesel fuel is equal to those vehicles using gasoline in each county. (See table on page A-8.)

Motor Vehicle License Fees

The Department of Motor Vehicles' records show an average vehicle license fee categorized by autos, trucks, trailers, and motorcycles. This average vehicle license fee and the number of registered vehicles per county were used to compute the estimated vehicle license fees per county.

The assumption underlying this method is that the value of licensed vehicles is proportionate in each county. (See table on page A-12.)

Trailer Coach Fees

Trailer coach fees are recorded by county and are reported semi-annually. The trailer coach fees revenue shown in the table on page A-13 is the total collected for the fiscal year.

Registration Fees

Paid vehicle registrations per county were used to estimate each county's registration fees since the registration fee for all vehicles is the same. (See table on page A-9.)

Weight Fees

All vehicles registered as commercial vehicles must pay fees based upon vehicle weight. We used commercial vehicle data to compute weight fee estimates by county. By applying this method, we assume that vehicles in each county have comparable average weights. (See table on page A-10.)

Drivers' License Fees

The percentage of licensed drivers in each county was determined; these percentages, applied to the total drivers' license revenue received, yielded an estimate of this revenue within each county.

For this estimate, we assumed that the number of new and renewed licenses in each county during the fiscal year were directly proportional to the total licenses outstanding in that county. This method may cause discrepancies in any one year, but data covering the four-year period should be reliable. (See table on page A-11.)

Other Revenue

Other revenue is collected in the five accounts: Motor Vehicle Fuel Account, Motor Vehicle License Fee Account, Motor Vehicle Account, Highway Properties Rental Account, and State

Highway Account. The share of these revenues per county is estimated. (See table on page A-14 and A-15.)

Federal Revenue

The four cent federal tax on gasoline, diesel and special fuel and the federal excise tax on tires, tubes, and trade rubber supply federal funds for highway aid. Other sources of federal revenue include a tax on new trucks, buses, and trailers weighing over 10,000 pounds; a tax on truck parts and accessories; and a use tax on vehicles weighing over 26,000 pounds.

In estimating the county distribution of federal revenue, we used the county percentages developed from the state gasoline tax county estimates because: (1) the basis of both federal and state gas tax is the same; and (2) approximately 90 percent of the federal revenue is derived from motor fuel taxes on gasoline and diesel fuel. (See table on page A-16.)

EXPENDITURES AND DISTRIBUTIONS

Funds from the state highway program are either distributed to local agencies, spent by the Department of Transportation, or transferred to other state agencies. A description of these expenditures and distributions as well as information on our method of allocation follows.

Payments to Local Agencies--
Restricted to Highway Use

An amount equal to 3.39 cents per gallon of the state gasoline tax is distributed to local agencies by the State Controller. Use of these funds is restricted to public streets and highways. The table on page A-17 illustrates this portion of the total gasoline tax distributions by county.

The Department of Transportation receives rental revenue on property (being held for rights of way) that is leased until construction of the highway begins. Each county in which a leased property is located receives 24 percent of the rental revenue from the State Highway Account. Use is restricted to public streets and highways. (See table on page A-18.)

Payments to Local Agencies--
Use Not Restricted

Motor vehicle license fees and trailer coach license fees are returned to cities and counties in accordance with Section 11005 of the Revenue and Taxation Code. Total distributions by county are included in the table on pages A-19 and A-20.

Department of Transportation Expenditures

Construction and maintenance expenditures by county are recorded by the California Department of Transportation and are published in its annual "State Highway Program Financial Statements and Statistical Report." These expenditures are found in the tables on pages A-21 and A-22.

Expenditures for administration and other state programs are estimated based on the county percentage of construction and maintenance expenditures. For fiscal year 1977-78, however, the California Department of Transportation provided these expenditures by county:

Local Assistance	\$80.9 million
Other Projects	\$13.1 million

We included these amounts as reported by county and then estimated the balance of expenditures for other projects and for administration (See table on page A-23.)

Transfers to Other Funds and Support for Other Agencies

These categories include distributions of money to other funds or accounts:

Transfers:

1. Harbors and Watercrafts Revolving--(Revenue and Taxation Code Section 8352.4)
2. Off-Highway Vehicle Fund (Revenue and Taxation Code Section 8352.6; Vehicle Code Section 38225)
3. Agriculture Fund (Revenue and Taxation Code Section 8352.5; Agriculture Code Section 224)

Support for Other State Agencies:

1. Board of Equalization
2. State Controller
3. California Highway Patrol
4. Department of Motor Vehicles

These distributions were allocated to each county on the same basis as the revenue received. Although this method may seem to estimate a distribution of funds to counties where no benefit would apply, it yields the same results as deducting the transfers from the revenue before making estimates to each county. (See pages A-26 and A-27.)

Changes in Fund Balance

The consolidated statement of revenues and expenditures (on pages A-3 through A-6) shows that in some accounts more money was expended than revenues received, while in other accounts all the revenue was not spent or was distributed to other funds or accounts. We have treated these as changes in fund balance--excess expenditures are a reduction of surplus and excess revenues an increase of surplus. The changes in each account are allocated by county just as the estimated revenue is distributed within that account. These changes apply to current year revenues and expenditures/distributions only. We did not consider prior year adjustments to either revenues or expenditures. (See table on page A-28.)

LOSS OF FEDERAL DOLLARS

The difference between federal highway users taxes paid by California residents and federal aid received by the Department of Transportation is treated as "loss of federal dollars." This loss is estimated on a county basis, as is the revenue. (See table on page A-29.)
